1/500 с.п. 1-Ротен А.Д. Черубидзе

The first part of the paper, devoted to the
 description of the general principles of the
 theory, is of a more popular character, and
 is intended to give a general idea of the
 subject to those who are not conversant
 with the details of the science. The second
 part, which is more technical, is devoted
 to the description of the various methods
 which have been employed in the study of
 the subject, and to the results which have
 been obtained. The third part, which is
 the most important, is devoted to the
 description of the various theories which
 have been advanced, and to the reasons
 which have led to their adoption. The
 fourth part, which is the most interesting,
 is devoted to the description of the various
 experiments which have been performed,

The following is a list of the various
 experiments which have been performed.

1851-52.

Chapman.
